Business Case BulkCart

Introduction

Business Case Conceptual Structure	Definitions
	Customer: The customers are Retailers (Buyers). This includes small to medium grocery shops, supermarkets, restaurants, cafés, catering businesses, and small food service companies who purchase wholesale products. **Supplier**:The suppliers are Food Distributors and Wholesalers (Sellers). This includes manufacturers of packaged food items and importers/exporters of specialty food products who provide inventory to the platform **Stakeholder**:The internal stakeholders with a vested interest in the business performance include the Sales Group (business development), Finance Group (accounts payable/receivable), Customer Success/Support Team, and the Product Development Group responsible for building and maintaining the complex platform. **Business Model:** We adopt a B2B SaaS with Commission & Premium Features model. This includes: **Subscription Fees**: Monthly fees paid by suppliers to list products. **Commission**: A small percentage (1–2%) on total order value. **Premium Features**: Paid add-ons for advanced analytics and API integrations. **Distribution Channel:** Our primary distribution channel is a Direct Web Portal, where retailers register and order directly. Secondary channels include social media marketing, industry partnerships with grocery associations, and direct sales outreach to enterprise suppliers.

Application Name: BulkCart

Category	BC Section	Questions	Answers
WHAT?	**Product Overview**	*Give a brief description of the proposed software product.*	A B2B SaaS web portal connecting food retailers (restaurants, grocery shops) directly with wholesale suppliers to streamline bulk ordering, inventory tracking, and procurement.
	Value Propositions	What Customer business needs are we satisfying?	Satisfies needs for 24/7 mobile ordering convenience, cost savings via instant price comparisons, automated inventory tracking, and real-time business intelligence for both parties.

		What value do we add to the Customers?	**Retailers:** Volume discounts, AI-driven reorder suggestions, and account-specific pricing . **Suppliers:** Automated order processing, real-time multi-warehouse inventory tracking, and reduced administrative overhead.
	Type of Business Model	What type of a business model do we adopt?	**B2B SaaS with Commission:** Suppliers pay monthly subscription fees (tiered) and optional transaction commissions (1-2%). Retailers join for free to drive adoption.
	Key Resources	What Key Resources do our value propositions require?	Development team (NestJS/Angular), cloud infrastructure (AWS/PostgreSQL), B2B domain consultants, and a customer success team for onboarding.
		What are our Distribution Channels?	
	Technology	What technology will we use to build the product?	**Front-end:** Angular (TypeScript), Material UI. **Back-end:** NestJS (Node.js), PostgreSQL, MongoDB, Redis. **Infra:** Docker, Cloud Hosting (AWS).
		Is it a mobile or Web/desktop application?	Primarily a **web application** optimized for desktop and tablet; includes mobile responsivenes
	Known Prototypes	What are the know prototypes of your product? *Reference some known portals on the Internet that are similar to your product. You will use these prototypes for developing business, user requirements.*	List of Prototypes: Alibaba B2B, IndiaMART, Udaan, Instacart Business.
WHO?	**External Customers**	Who are our Customers?	**Retailers:** Restaurants, grocery shops, cafes, catering . **Suppliers:** Food distributors, wholesalers, manufacturers.
	External Suppliers	Who are our Suppliers? *Does the system exchange data with external systems? For example, banks, delivery contractors, restaurants, etc.*	Payment Gateways (Stripe/PayPal), Email Services (SendGrid), and optional Logistics/Cloud Storage integrations.
	Internal Stakeholders	Who are our internal Stakeholders? *Do we need a product development group?* *Do we need a sales group?* *Do we need a finance group (accounts payable, receivable)?* *Do we need a customer support team?*	Product Development (Engineering), Finance (Accounts Payable/Receivable), Customer Support, and a small Sales team for partnerships.

		Do we need an advertising management group?	
WHY?	**Expected Benefits to the Customer**	Why do we believe our new product will be better than those already existing on the market?	Niche focus on food storage/expiry tracking (unlike generalist portals), AI-powered reorder predictions, and specialized B2B approval workflows.
		Why the Customers would want to use our system?	**Retailers:** Cost savings via bulk discounts and ordering convenience. **Suppliers:** Direct market access, operational efficiency, and reduced manual order processing.
HOW?	**System Use**	How will the External Customers use the system? What is the main system use scenario for the External Customers?	Register account, browse catalog, build purchase orders (PO), manage manager approvals, track shipments, and download invoices.
		What is the main system use scenario for the Internal Users?	Manage product catalogs/inventory, set tiered pricing, process incoming orders, track shipments, and monitor sales analytics.
	Revenue Generation, Revenue Streams	How will we make money? *Such as Subscription fees, renting, leasing, licensing, brokerage fees, advertising sales, etc.*	Supplier subscriptions ($300-$1000/mo), optional order commissions (1-2%), and fees for premium features like API access.
